

LE2000

Putters

The LE2000 putter is our flagship limited edition model. This one-piece hosel putter is completely CNC milled from 303 hybrid stainless steel. The LE2000 eliminates the need to carry an oilcan in your golf bag, as the 303 stainless steel is highly corrosion-resistant. The LE2000 is our most precise putter and is machined to tolerances of .0001". The 303 stainless is a very soft steel alloy that, with solid one-piece milling technology, produces unrivaled feedback and feel. This putter comes in a 3° loft and 333 gram head weight. The LE2000 features a stepless steel shaft and hand-wrapped leather grip.

AH Putter

The RBPAAH putter is a bi-metal, two-piece putter that has a CNC-milled head, made of super soft special project brass, and a CNC-milled aluminum (T6160) hosel. The AH putter is one of the most accurate putters available, machined to tolerances of .0001". The brass head and aluminum hosel combination produce a uniquely solid, soft feel. Three loft/weight combinations are available: 3°/320 gram, 4°/330 gram, and 5°/340 gram. Loft increases of 1° are accompanied by 10-gram increases in weight.

NH Putter

The RBPNNH putter is completely CNC milled from super soft special project brass. The NH is machined to tolerances of .001". Three loft/weight combinations are available: 3°/320 gram, 4°/330 gram, and 5°/340 gram. Loft increases of 1° are accompanied by 10-gram increases in weight. This putter comes with a 72° lie angle and a mild offset double bend shaft.

RedBird Sports designs and handcrafts our distinctive line of **putters**, using the latest technology and the finest materials. Our classic clubhead design and meticulous attention to detail result in some of the most precise putters available. We have developed a loft-vs.-weight system that makes it possible to tailor your putter selection to the type of putting surfaces you play on most often. Our system is based on the theory that lighter, less lofted putters are best suited to faster, smoother greens and more lofted, heavier putters work better on rougher, slower surfaces.

RedBird Sports Putters Specification Chart				
Putters	Loft	Lie	Head Weight (grams)	Length (inches)
NH3320	3°	71°	320	30-37
NH4330	4°	71°	330	30-37
NH5340	5°	71°	340	30-37
AH3320	3°	72°-74°	320	30-39
AH4330	4°	72°-74°	330	30-39
AH5340	5°	72°-74°	340	30-39
LE2000	3°	72°-74°	333	30-39
